

Instructions for patient: **YOU MUST PRINT** and bring this form with you to your nearest LabCorp to have your blood drawn. You will get your blood drawn after approximately 60 days of being on Accutane (at least 3 days before your first follow-up visit with your Clear Health doctor) – please check your Clear Health portal for a message by your doctor detailing when you will need your blood drawn. You will also get a notification on your Action Items tab at the appropriate time.

Since this form indicates the blood draw is repeated monthly, your LabCorp should not need this form again after the initial blood draw should you need additional blood draws after your initial one.

You can find your nearest LabCorp center here: <https://www.labcorp.com/labs-and-appointments-advanced-search>
